### Bericht (mind. 1 Seite):

When the name Erasmus comes in my mind, i always imagined how great it could be as I was looking all the Erasmus students coming at my university TU Chemnitz. These guys were always enjoying, making trips, and most importantly super friendly which i admired the most. I never knew how difficult it could be to manage everything side by side including studying.

So let me start with the most important thing, never forget that you are going to a place where you will study, not only partying, exploring cultures etc however i totally agree they matter a lot but keep your priorities straight. For me i would say it was an amazing experience with meeting lots of great people however i didn't know that i had to manage my tme accordingly. Believe me thats the only problem i had and everything else was truely a great experience. A roller coaster ride of 5 months.

Czech Republic being the centre of Europe was a really big advantage. I not only enjoyed learning Czech language, eating local cuisines, meeting local people but also met a lot of tourists from all over the world. I ate with them as well, learned their cultures and made memories which will always make me smile. Every weekend was an adventure where you meet different people from different nationalities just to visit one of the most beautiful capitals in the whole world, Prague.

This erasmus will always have a special place for me as it groomed me, not only personally but professionally. I made a lot of networking which i am sure will help me in my future. The purpose of Erasmus would be in my point of view is just to explore your self in a different view. It's always the people or the culture you want to explore and if it satisfies your soul, means it is totally worth it. I will always recommend taking the opportunity for Erasmus as it let's you explore not only a new nationality but yourself too. You leave a part of your self there because you know when the time ends of your Erasmus that you will be back their soon for sure and for good.
