What did you think of the teaching of the summer school (sessions, style, Powerpoint slides, content, tasks, etc.)?

"There were many interesting materials, all of them useful. The content was very good and I especially liked the tasks where we could work together and exchange experiences."

Can you describe how the summer school has changed you, if at all? E.g. have you changed perspective in any way because of the summer school? How has your thinking changed?

"It has helped me feel closer to the neighboring countries around Albania"

"I think that my critical thinking has developed a lot. It made me realize that everything has at least 2 sides to consider. The summer school has also made me more interested in media texts analysis, which was a new area for me."

"I learned that it is good to associate with people from different nations. It changed me to see things in a different way, sharing a lot of opinions."

What advice would you give to another student who is considering attending the summer school next year?

"I would heartly recommend the students to attend the summer school. It is such a great experience. The opportunity to meet people with different nationalities and different background is not given to everyone"

I would definitely recommend to try because is a lifetime experience"

"I would advise him to come and sumply enjoy the summer school. Because there are a lot of hangouts, learning new things and a good timetable."

Please tell us the things you enjoyed about the summer school:

"I really like the fact that I now feel a bit more knowledgeable about media studies. I also enjoyed meeting new people and getting to know more about their culture."

"It was the first time that I attended a summer school and l really enjoyed almost the whole program: presentations and tasks. But l would like to stress out the students' cooperation. It was amazing how members of international groups supported each other."

"Well, I enjoyed in everything. And honestly I didn't want this summer school to end."
