“This master’s programme significantly reflects the approved socio-scientific management competence at Technische Universität Chemnitz. We, the largest cooperation partner of TU Chemnitz, will continue to focus on the best educated young academics in the future and appreciate the commitment of the Faculty of Economics and Business Administration.” (Henry Mehnert, Director of Human Resources and Industrial Relations, Volkswagen Saxony, LLC)

What characterizes the Master degree program Management & Organisation Studies?

The master’s programme Management & Organisation Studies builds on a strategic management perspective and aims at developing knowledge in leadership, human resources management, organisational studies, organisational change as well as knowledge management and innovation strategies. The contents are research- and practice-oriented and the development of interpersonal and methodological skills are emphasized. Project-oriented and action-based learning is implemented in the first semester by means of a business game, and is furthermore encouraged by advanced training in the context of a consulting or research project. Moreover, students have the possibility to gain international experience during a stay abroad at a partner university in their third semester or by participating in the summer school on Intercultural Management.

“After having made good experiences during our bachelor studies at Chemnitz University of Technology with majoring in personnel, organisation and innovation, we are looking forward to the new master’s programme Management & Organisation Studies particularly because of the international orientation. We are sure of being able to expand our knowledge in those important fields of management and of having good future job prospects in the economy as well as research.” (Daniele Radi und Sarah Dorst, students of B. A. Economics)
