The interface between human being and technology has a decisive significance especially in the sports area. The combination of two fields of knowledge with totally different requirements and methods makes the course very fascinating and imparts cross-sectional knowledge which is demanded for the design of each technical facility operated by humans.

Prof. Dr. Stephan Odenwald, holder of the professorship Sports Equipment & Technology
What characterises the Bachelor’s degree programme Sports Engineering?

Every Athlete depends on his sport equipment, whether it is a sport shoe with special damping characteristics, a state of the art racing bike or an individually adapted tennis racket. The Sports Engineering program takes into account the raising significance of the interaction human being with equipment in the area of sports and links two fascinating research fields: Human Movement and Engineering Sciences. Within the programme students will be enabled to think and act in a transdisciplinary way. The studies will focus on challenges which can only be solved by a joint contribution of sports science and technology.

“I can highly recommend this transdisciplinary course to everyone who is fascinated by technologies for practice and support of human movement. I appreciate especially the broad teaching of engineering sciences and their junction with sports sciences at Chemnitz University of Technology.”

Dr. Peter Wolf, Graduate (Sensory-Motor Systems Lab, ETH Zürich)
Degree Structure

**Basic Modules (1st - 6th semester)**
- Technical Physics
- Higher Mathematics
- Basics of Sport Technology
- Equipment and Materials in practice
- Technical Mechanics
- Engineering Design/Mechanical Components
- Materials
- Electrical Engineering/Electronics
- Basics of Sport Science
- English Communication in studies and science
- Scientific work/Statistics
- Manufacturing and Polymer Technology

**Complementary Module (5th semester)**
- Project

**Module Bachelor Thesis**
Along with studies in the 6th term

This course includes a first mandatory industrial internship at the extent of six weeks which has to be proved until the 3rd term at latest.

**Career Opportunities**

Graduates will find a great variety of interesting occupational areas on the German as well as on the international job market, f.e.
- Development of equipment technology for leisure time, prevention and fitness
- Development and maintenance of apparatus for diagnostics and rehabilitation
- Operation and maintenance of technical equipment in training centers
- Employment at institutions for certification, standardization and testing
- Implementation of R&D-projects at scientific institutions and in enterprises

After the successful completion of the Bachelor’s degree programme it is possible to deepen and enlarge the acquired knowledge in Master’s degree programmes. Chemnitz University of Technology offers a Master degree program in Sports Engineering.
GENERAL INFORMATION
Admission requirements: usually general qualification for university entrance
Standard period of study: 6 semesters
Degree: Bachelor of Science (B.Sc.)
Start of the degree programme: usually winter semester
Language of tuition: German
