Europe is looking
at Chemnitz – but
how is Chemnitz
looking at
Europe?

Photo: Jakob Müller

Chemnitz citizens now have their say: How did they perceive Europe during their school days, as teachers, or even as educational politicians before and after 1989? How has their view of the European Community changed to this day?

Interviews with contemporary witnesses will be illustrated in collaboration with artists and presented in **the University Library on December 3, 2025**.

The aim is to promote collaboration between academia and cultural institutions of Chemnitz and to encourage remembrance of the period since reunification. Aneca thus follows on from the TUCculture2025 project "Europe in the Classroom".
