Study plan

Course material - OPAL

Schedule for this term -  
Vorlesungsverzeichnis

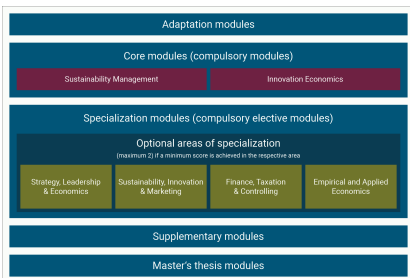

Exam registration - Sbservice

# When to register for exams

Exam period	Happens when	When to register
(Language courses, summer term)		(April 20-30)
Repeat exams, winter term	Usually the week after pentecost ( <b>This term: May 26-29</b> )	Late April / early May ( <b>This term: April 27-30</b> )
Regular exams, summer term	The 4 weeks after the end of term; mid July to mid August ( <b>This term: July 20 - August 14</b> )	Usually early to mid June ( <b>This term: June 8-19</b> )
Repeat exams, summer term	First full week of January (next term: January 4-8)	Late November
Regular exams, winter term	The 4 weeks after the end of term; usually 2nd full week of February until beginning of March	Mid December

# What courses to take

- **Mandatory** courses:
  - "Innovation economics" (winter term) 5 credits
  - "Sustainability management" (summer term) 5 credits
  - (Unless taken as part of the Bachelors degree:) "International Strategy" (summer term) 5 credits
  - Master thesis and colloquium (last term) 30 credits
- **Total** credits: 120
- Credits in **adaptation modules** (incl. "International Strategy"): Max. 15
- Credits in **supplementary** and **adaptation modules**: 20
- Credits in **specialization modules**: 60
- Taking at least one **seminar** type course is strongly advised.

<b>Total Credits</b>	<b>40</b>	<b>35</b>	<b>10</b>	<b>30</b>	<b>115</b>

**Some warnings are marked in red if the sequence of courses does not make sense.**

Total credits in term 1 should be about 30.

Total credits in term 2 should be about 30.

Total credits in term 3 should be about 30.

Total credits must be exactly 120.

Czech language courses are not in the correct order.

At least one course in this study plan will be given in German instead of English as usual in the term it was selected for.

The study plan contains the advanced course "Organization and Strategy Research". It is strongly advised that the preliminary organization course "Understanding Organizations: Theories & Applications" is taken before that, unless an equivalent course has been taken as part of a previous degree (e.g., your Bachelor's degree).

The study plan contains the course "Empirical Economics II". Students are strongly advised to take the preliminary course "Empirical Economics I" before that, unless an equivalent course has been taken as part of a previous degree (e.g., your Bachelor's degree).

The study plan contains the course "Advanced Microeconomics". It is recommended that students should have taken an intermediate microeconomics course before. This could be as part of a previous degree (e.g., your Bachelor's degree) or alternatively here in the form of the course "Mikroökonomie II" (in German).

# Schedule for this term: Caveats

- Language-related courses are not in the Vorlesungsverzeichnis.
  - They can be found on the website of the Fachsprachenzentrum <https://www.tu-chemnitz.de/sprachenzentrum/allgemeines/kursplan.php.en>
  - This includes all languages in the study plan: German as a foreign language, Arabic, Chinese, French, ...
  - It also includes "Academic Writing and Speaking" (listed on the Fachsprachenzentrum website under "EfaF (English for all Faculties)" as "Englisch Kurs 4 (C1) Scientific Writing & Speaking")
- Seminars are often only listed with generic names ("Master-Seminar (BWL4)" etc.) in the Vorlesungsverzeichnis (see next slide).
- Some courses are given in German in some terms and then have German titles in the Vorlesungsverzeichnis:
  - "Valuation" is "Unternehmensbewertung" in this term
  - "Mathematical Models in Economic Sciences" - "Mathematische Modelle in den Wirtschaftswissenschaften"
- Some courses have slightly different titles in the Vorlesungsverzeichnis
  - Project Management Skills - Project Management Group A / B
  - Academic Skills - English for Academic Purposes

# Schedule for this term: Seminars

The screenshot shows the TU Chemnitz website. The top navigation bar includes 'Deutsch', 'Startseite', 'My Info', 'My Profile', 'Contact', and a search field. Below this is a secondary navigation bar with 'University', 'Faculties', 'Central Institutions', 'Studies', and 'International'. The main content area is titled 'Microeconomics' and 'Courses in the Winter Semester 2025/26'. A sidebar on the left lists 'Chair', 'Research', 'Teaching', 'Courses in the Summer term', 'Courses in the Winter term', 'Course Archive', 'Examinations', 'Bachelor's and Master's Theses', 'Course Catalogue', 'Study plan Business & Economics', 'Economic Research Seminar', and 'GENED 2024'. The main content area features a photograph of a modern building at night, followed by a list of course options: 'Courses' and 'Seminars and Publicum'. A red box highlights the 'Seminars and Publicum' section, containing the following text: 'Innovation and technological progress: Measurement, Prediction, Policy. Please email at the DPM, course to get access to the teaching material. Please note: All the projects will almost always involve data analysis or modeling, basic knowledge in programming is necessary. We would recommend that you have some working knowledge in either R or Python, although other programming languages are also acceptable. Basic knowledge would be assured if you have for example passed any one of the following courses: Computational Economics I or II, Empirical Economics I or II, Introductory Empirical Economics (Graduate) or empstat (Wirtschaftsinformatik) or the seminar on Agent Based Modeling. If you have doubts about this point, please get in touch with the lecturers.' Below this, a table provides details for the seminar: 'Type of Course: Seminar (2)', 'Lecturers: Prof. Dr. Torsten Heinrich, M.Phil. Nils Rachelewitz', 'Seminar: Tuesday, 3:30 - 5:00 pm', and 'The Lecture starts on October 21 2025.'

- For these, you may have to check the websites of the professorships.
- In the Vorlesungsverzeichnis, seminars are frequently only listed as "Master-Seminar (BWL4)", "Master-Seminar (VWL2)" etc.
- Topics of seminars may change from term to term.
- Seminars (especially those with changing topics) can often be used for various seminar-slots in the study plan.

# Schedule for this term: Seminars

The screenshot shows the website of the University of Applied Sciences (HTW) Chemnitz. The page is titled "Courses in the Winter Semester 2025/26" under the "Microeconomics" department. A red banner at the top of the content area contains the text: "Innovation and technological progress: Measurement, Prediction, Policy". Below this, a note states: "Please note: As the projects will always involve data analysis or modeling, basic knowledge in programming is mandatory. We would recommend that you have some working knowledge in either R or Python, although other programming languages are also acceptable. Basic knowledge would be obtained if you have for example passed any one of the following courses: Computational Economics (or II), Empirical Economics (or II), Introductory Empirical Economics (or English) for economists (Wirtschaftsinformatik) or the seminar on Agent Based Modeling. If you have doubts about this point, please get in touch with the lecturers." Below the note, a table provides details for the seminar:

Type of Course:	Seminar (2)
Lecturers:	Prof. Dr. Torsten Heinrich M.Phil. Nils Rachewitz
Seminar:	Tuesday, 3:30 - 5:00 pm The Lecture starts on October 21 2025.
