3. Exam registration
4. Study program - what courses to take
5. Study plan - what courses to take when
6. Seminars
7. Master thesis

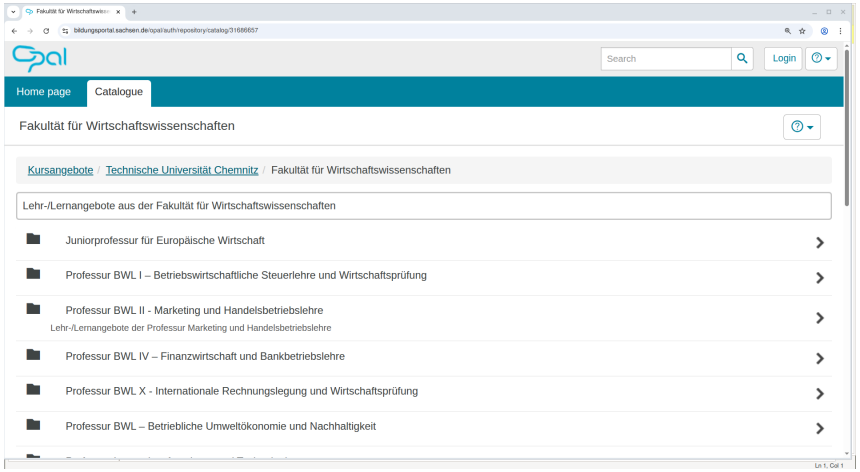

Online resources for (1) study plan, (2) schedule, (3) course material, (4) exam registration, (5) exam schedule

1. Study plan
   https://www.tu-chemnitz.de/wirtschaft/vwl2/studium/studienplan-be.php.en
2. Schedule for this term - Vorlesungsverzeichnis
   https://www.tu-chemnitz.de/verwaltung/vlvz/suche/
3. Course material - OPAL https://bildungsportal.sachsen.de/opal
4. Exam registration - SBService https://campus.tu-chemnitz.de/qisserver/pages/cs/sys/portal/hisinoneStartPage.faces?page=SBservi
5. Current exam schedule (a very long PDF document with most regular exams listed, including venue, date, and time; German only)
   https://www.tu-chemnitz.de/zpa/pruefungsplaene/gesamtPP.pdf

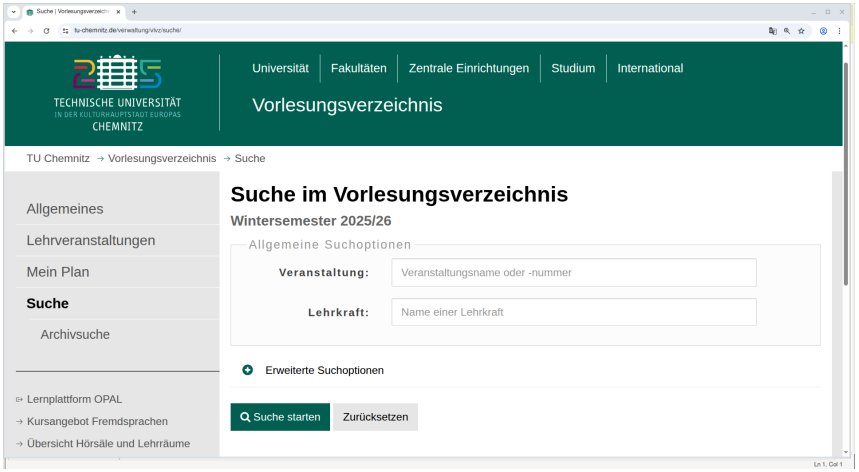

Online resources for (1) study plan, (2) schedule, (3) course material, (4) exam registration

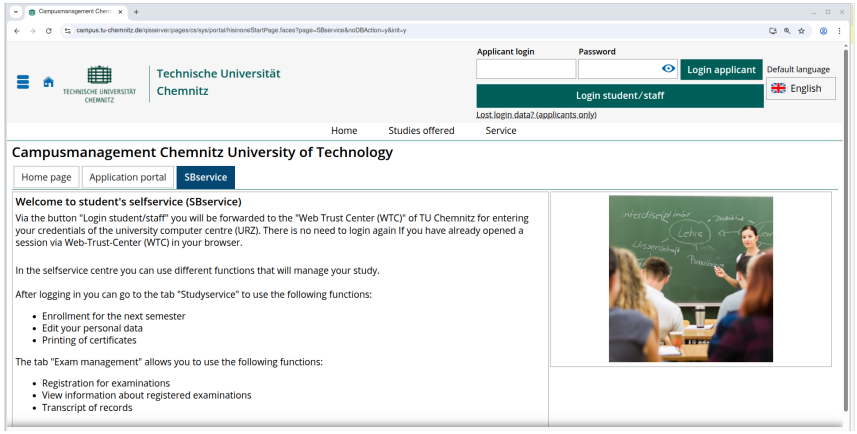

Study plan

Course material - OPAL

Schedule for this term - Vorlesungsverzeichnis

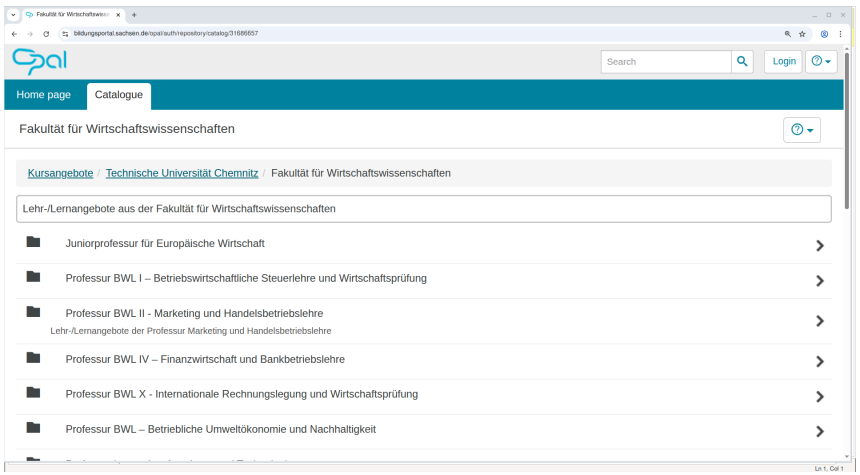

Exam registration - SBService

2 Course registration

1. Online resources
2. Course registration
3. Exam registration
4. Study program - what courses to take
5. Study plan - what courses to take when
6. Seminars
7. Master thesis

Course registration

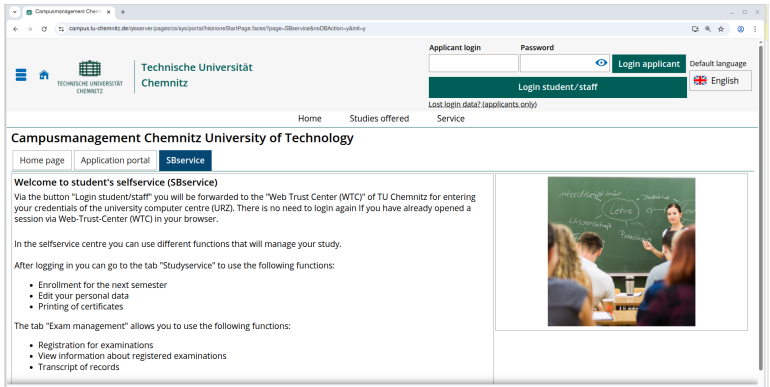

Course material - OPAL

- Registering in OPAL will give you access to course material
- For courses with a limited number of places, places are usually assigned by order of registration in OPAL
  - Be early
  - Find out early when registration opens and what the exact link is
  - This will be different from course to course
  - Students that do not show up in class are sometimes removed to make space for additional students who want to take the course.
- Registering in OPAL does not automatically register you for the exam
  - I.e., you can register in OPAL without worrying about that.

3 Exam registration

1. Online resources
2. Course registration
3. Exam registration
4. Study program - what courses to take
5. Study plan - what courses to take when
6. Seminars
7. Master thesis

Exam registration

Exam registration - SBService

- There are specific registration periods
  - Try to register in those periods
  - Late registration is sometimes possible, but you have to contact the central examination office (ZPA) and ask them to register you manually.
  - Stepping back from an exam is also possible before the exam; for this you also have to contact the central examination office (ZPA).
- By writing an exam you commit to take and eventually pass this course.
  - Failed exams can be retaken twice (once within the two terms after the first failed attempt, then again at the next possible opportunity).
  - Passed exams cannot be retaken.
  - Electives can no longer be changed after taking the exam the first time.
- If you are unwell on the day of the exam, get a doctor's certificate immediately and submit this to the central examination office (ZPA).
  - Then the exam does not count.
  - If you do not show up for an exam you are registered for, but do not hand in a doctor's certificate, it will count as a failed attempt.

Exam registration periods

Exam period	Happens when	When to register
(Language courses, winter term)	End of term	?
Repeat exams, summer term	First full week of January (this term: January 4-8)	Late November
Regular exams, winter term	The 4 weeks after the end of term; usually 2nd full week of February until beginning of March (this term: February 8 - March 5)	Mid December
Repeat exams, winter term	Usually the week after pentecost	Late April / early May
Regular exams, summer term	The 4 weeks after the end of term; mid July to mid August	Usually early to mid June

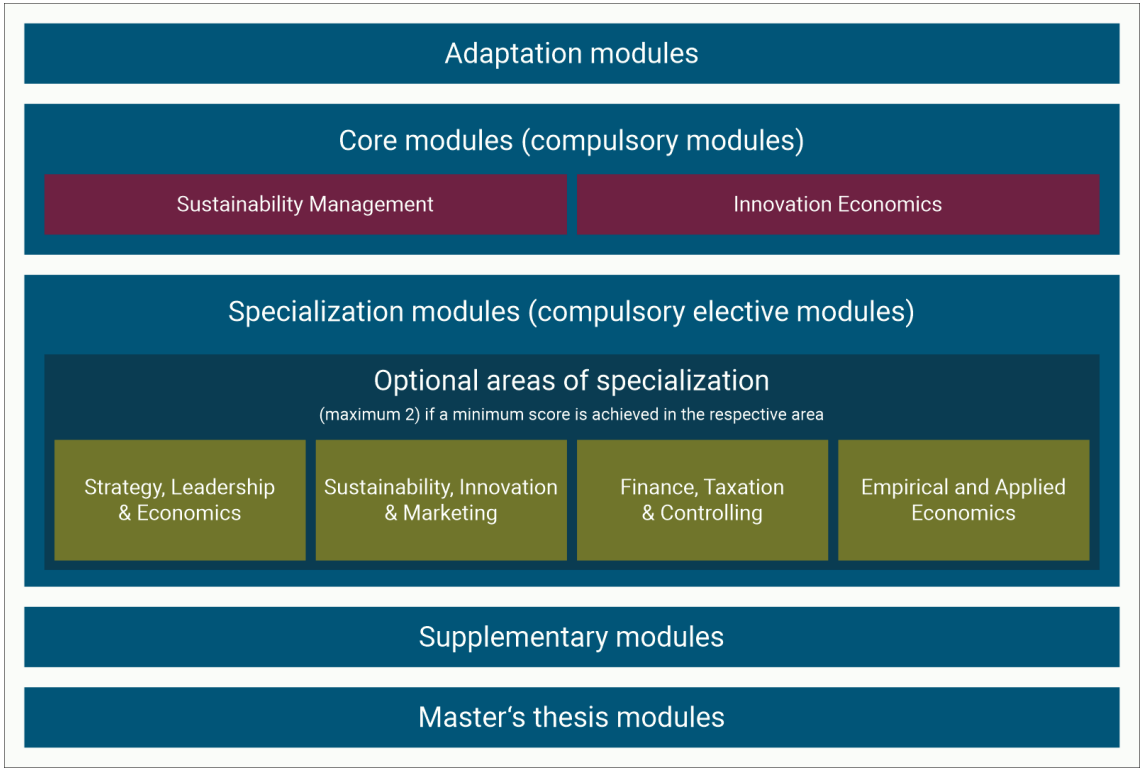

Exams

- Always confirm time and venue before the exam
  - Most regular exams (except for language courses etc.) are listed in the current exam schedule
  - The exam schedule is a very long PDF document which lists venue, date, and time of each exam; it is in German only
  - https://www.tu-chemnitz.de/zpa/pruefungsplaene/gesamtPP.pdf
- If you are not able to take the exam, de-register from it (otherwise it may count as a failed attempt)
  - If you can no longer de-register yourself in SBService (after the end of the registration period), contact the central examination office
- If you are unwell on the day of the exam, get a doctor's certificate immediately and submit this to the central examination office (ZPA).

4 Study program - what courses to take

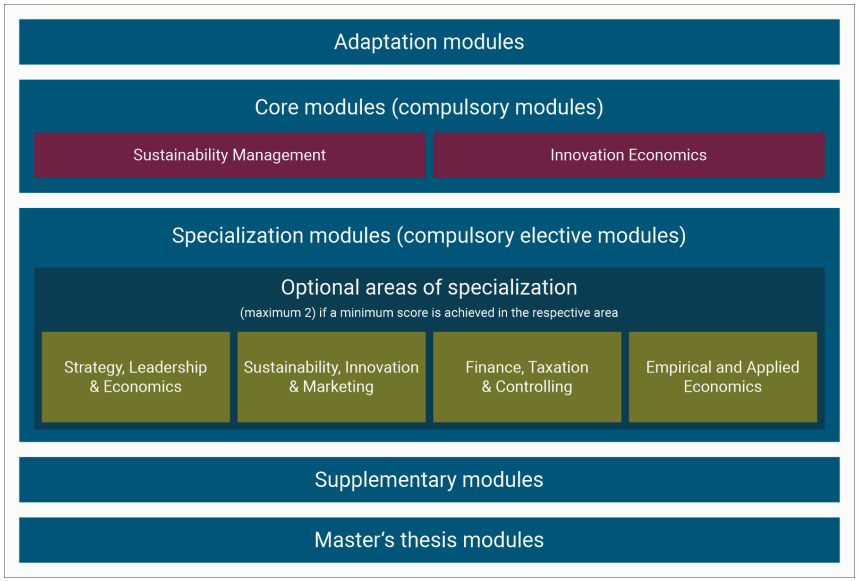

1. Online resources
2. Course registration
3. Exam registration
4. Study program - what courses to take
5. Study plan - what courses to take when
6. Seminars
7. Master thesis

What courses to take

- **Mandatory** courses:
  - "Innovation economics" (winter term) 5 credits
  - "Sustainability management" (summer term) 5 credits
  - (Unless taken as part of the Bachelors degree:) "International Strategy" (summer term) 5 credits
  - Master thesis and colloquium (last term) 30 credits
- **Total** credits: 120
- Credits in **adaptation modules** (incl. "International Strategy"): Max. 15
- Credits in **supplementary** and **adaptation modules**: 20
- Credits in **specializion modules**: 60
- Taking at least one **seminar** type course is strongly advised.

Elective courses: Adaptation and supplementary modules

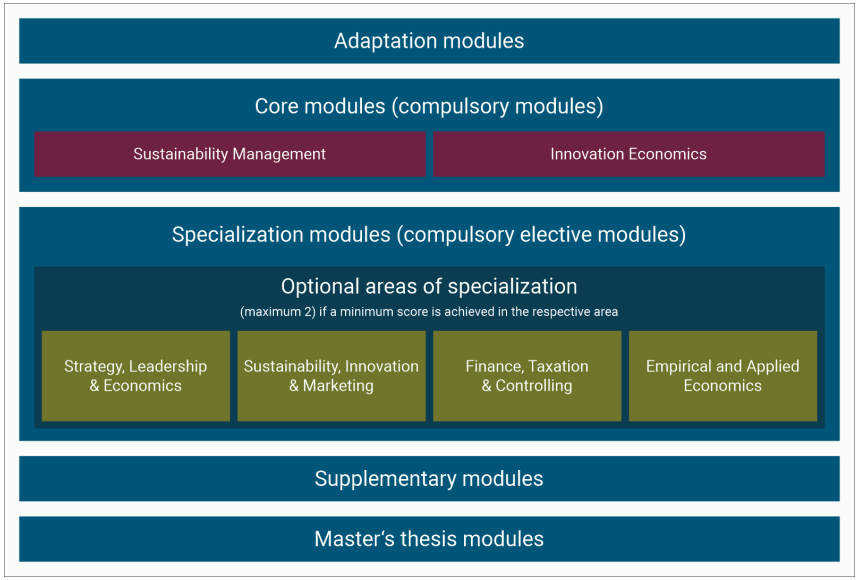

- In **adaptation** modules and **supplementary** modules, you have to earn **exactly** 20 credits.
- **Adaptation** modules (15 credits max.):
  - "International Strategy" (summer term) 5 credits
  - Additional Bachelor level courses
- **Supplementary** modules (20 credits max.):
  - Language courses
  - Additional qualifications (project management etc.)
  - Study abroad modules (see below)
  - Internship modules

Elective courses: Internship

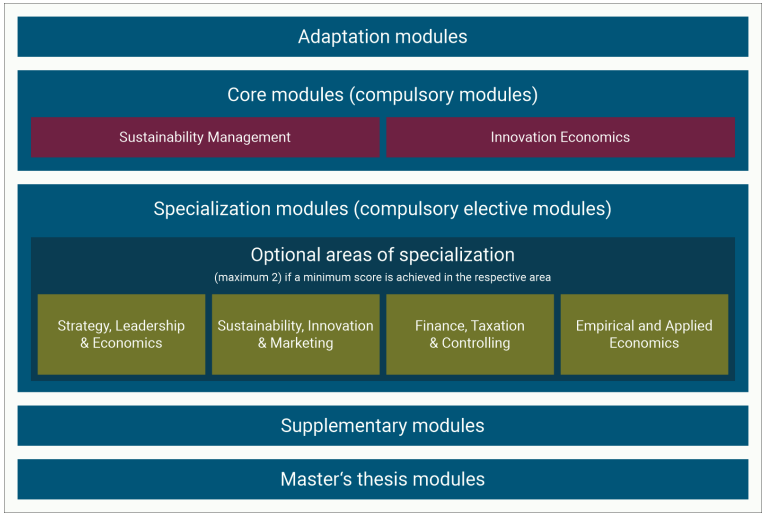

- Internship modules are part of **supplementary** modules.
  - 7-week internship (40 weekly work hours): 10 credits
  - 14-week internship (40 weekly work hours): 20 credits
- As you have to earn **exactly** 20 credits in **adaptation** modules and **supplementary** modules, you should make sure other courses do not get in the way of your internship, should you want to do one.
- How to proceed
  - Decide if you want to do an internship (and which one)
  - Find a firm or institution that will accept you as an intern
  - Complete the internship; the firm/institution is oblieged to provide you with an internship certificate
  - Submit (1) a copy of the internship certificate and (2) a 1-page A4 internship report to the head of the examination board
  - Once this is accepted, your internship will be registered with the central examination office (ZPA)
  - The ZPA can only register your internship if you have enough free credits left in this field (**adaptation** modules and **supplementary** modules)
- Internships are not graded, i.e. they count to your credits, but not to your grades.

Elective courses: Study abroad

- Study abroad modules are part of **supplementary** modules.
  - Up to four of 5 credits each
- As you have to earn **exactly** 20 credits in **adaptation** modules and **supplementary** modules, take this into account when planning for your study abroad.
- Study abroad modules are placeholder modules. If you do a term abroad,
  - you can take any course relevant for your degree program (business and economics) and receive the credits for a study abroad module.
  - you can also tale courses there on the same topic as a specific course here (say, Advanced Microeconomics). In this case you can receive the credits from abroad for that module and you do not need a study abroad module.

Elective courses: Specialization modules

- Exactly 60 credits in specialization modules.
- Each specialization course counts towards one of the fields of specialization:
  - Strategy, Leadership & Economics (SLE)
  - Sustainability, Innovation & Marketing (SIM)
  - Finance, Taxation & Controlling (FTC)
  - Empirical & Applied Economics (EAE)
- You can choose any specialization module that is offered.
- If you receive 30 credits in one specialization area, this area can be listed on your degree certificate.
  - You do not have to worry about this at all.
  - You can aim for a focus on one specialization area.
  - Theoretically, it is possible to do two (30+30=60), but:
    - Not every course is offered every year.
    - Scheduling for courses may conflict.
    - Courses may only accept a limited number of students.

Elective courses: Specialization modules SLE

- Specialization Strategy, Leadership & Economics (SLE) (Courses im **bold** offered this term)
  - **Valuation**
  - Game Theory (2027/28)
  - **Organization and Strategy Research**
  - **Current Issues in Organization and Strategy in the Global Context**
  - **HRM Research**
  - **New Concepts of Leadership**
  - **Advanced Macroeconomics**
  - Advanced Microeconomics (next term)
  - Economics of Inequality (next term)
  - Labor Law - Case Study (next term)
  - Understanding Organizations: Theories & Applications (next term)
  - Organization and Strategy in the Global Context (next term)
  - Project Management in Digital Organizations (next term, new course)
  - **Legal Issues of AI** (new course)
  - **Managing Artificial Intelligence** (new course)
  - **Design of Decision Systems** (new course)
  - **Seminar Microeconomics** (Seminars see below)

Elective courses: Specialization modules SIM

- Sustainability, Innovation & Marketing (SIM) (Courses im **bold** offered this term)
  - **Market Research**
  - **Climate Economics**
  - **Strategic IT Management**
  - **Technology Law**
  - **Resource Efficiency from an Economic Perspective**
  - **Supply Chain Management**
  - **Empirical Economics I**
  - Empirical Economics II (next term)
  - Economics of Climate Change & Sustainable Finance (no longer offered)
  - Consumer Behavior (next term)
  - Life-Cycle Engineering (next term)
  - Intellectual Property Law - Case Study (next term)
  - Global AI Law (next term)
  - **Seminar SIM** (Seminars see below)

Elective courses: Specialization modules FTC

- Finance, Taxation & Controlling (FTC) (Courses im **bold** offered this term)
  - **Valuation**
  - **Applied Energy & Climate Finance**
  - **Mathematical Models in Economic Sciences**
  - **Resource Efficiency from an Economic Perspective**
  - **International Economic Law**
  - Economics of Climate Change & Sustainable Finance
  - Introduction to International Tax Management (next term)
  - Life-Cycle Oriented Management (next term)
  - Banking & Risk Management (next term)
  - Advanced Digital Finance (next term)
  - Data Engineering (next term, new course)
  - Project Management in Digital Organizations (next term, new course)
  - Mathematics of Big Data Analytics (summer term 2027 or 2028)

Elective courses: Specialization modules EAE

- Empirical & Applied Economics (EAE) (Courses im **bold** offered this term)
  - **Market Research**
  - **Advanced Macroeconomics**
  - **Supply Chain Management**
  - **International Economic Law**
  - **Computational Economics II**
  - **Empirical Economics I**
  - Empirical Economics II (next term)
  - Advanced Microeconomics (next term)
  - Data Engineering (next term, new course)
  - Seminar Macroeconomics (Seminars see below)
  - Seminar General Economics (Seminars see below)

5 Study plan - what courses to take when

1. Online resources
2. Course registration
3. Exam registration
4. Study program - what courses to take
5. Study plan - what courses to take when
6. Seminars
7. Master thesis

How to proceed

- 1. Decide what courses you wish to take
- 2. Use the interactive online study plan to select and allocate all courses to a specific term
- 3. Find the courses you want to take this term in the course directory (Vorlesungsverzeichnis)
- 4. Find the OPAL course of the courses you wish to take this term and sign up
- 5. Identify any scheduling conflicts. In case of scheduling conflicts

How to proceed

- 1. Decide what courses you wish to take
  - Specialization yes/no
  - Which specialization
  - Any particular courses you are interested in
  - Internship yes/no
  - Study abroad yes/no
  - ...
- 2. Use the interactive online study plan to select and allocate all courses to a specific term
- 3. Find the courses you want to take this term in the course directory (Vorlesungsverzeichnis)
- 4. Find the OPAL course of the courses you wish to take this term and sign up
- 5. Identify any scheduling conflicts. In case of scheduling conflicts

How to proceed

- 1. Decide what courses you wish to take
- 2. Use the interactive online study plan to select and allocate all courses to a specific term
  - Every field on the right hand side is green when the study plan is valid.
  - Consider each warning.
  - When the study plan is valid, you can print it (e.g., as pdf) and use it as a master-plan for your studies.
  - Note that there may be unforeseen changes, scheduling conflicts, limited number of spaces in some courses
    - Also consider alternatives for such cases
- 3. Find the courses you want to take this term in the course directory (Vorlesungsverzeichnis)
- 4. Find the OPAL course of the courses you wish to take this term and sign up
- 5. Identify any scheduling conflicts. In case of scheduling conflicts

How to proceed

- 1. Decide what courses you wish to take
- 2. Use the interactive online study plan to select and allocate all courses to a specific term
- 3. Find the courses you want to take this term in the course directory (Vorlesungsverzeichnis)
  - Some courses show up under different names (e.g., "Valuation" as "Business Valuation")
    - Confirm with the lecturer (or with us) that you have the right course.
  - Generic seminars (Seminar General Economics, Seminar Microeconomics, Seminar Macroeconomics, Seminar SIM) always show up under different names.
    - You may have to check the websites of individual professorships to find some seminars.
  - Some courses consist of lectures ("Vorlesungen, V") and exercise classes ("Übungen, Ü"). In this case, you will want to take both. There will be only one exam for both together.
- 4. Find the OPAL course of the courses you wish to take this term and sign up
- 5. Identify any scheduling conflicts. In case of scheduling conflicts

How to proceed

- 1. Decide what courses you wish to take
- 2. Use the interactive online study plan to select and allocate all courses to a specific term
- 3. Find the courses you want to take this term in the course directory (Vorlesungsverzeichnis)
- 4. Find the OPAL course of the courses you wish to take this term and sign up
  - Some courses may only offer a limited number of places.
  - Enrollment for some courses only opens at a specific time, especially for courses with a limited number of spots.
  - Enrollment in OPAL gives you access to course material.
  - Enrollment in OPAL does not sign you up for the exam; this has to be done in SBService later.
- 5. Identify any scheduling conflicts. In case of scheduling conflicts

How to proceed

- 1. Decide what courses you wish to take
- 2. Use the interactive online study plan to select and allocate all courses to a specific term
- 3. Find the courses you want to take this term in the course directory (Vorlesungsverzeichnis)
- 4. Find the OPAL course of the courses you wish to take this term and sign up
- 5. Identify any scheduling conflicts. In case of scheduling conflicts
  - ...consider postponing one course to next year
  - ...replacing one course with a different one in your study plan
  - For small courses, it may be possible for the lecturer to change the time slot, if many people have scheduling conflicts.

Total Credits	**40**	**35**	**10**	**30**	**115**

Some warnings are marked in red if the sequence of courses does not make sense.

Total credits in term 1 should be about 30.

Total credits in term 2 should be about 30.

Total credits in term 3 should be about 30.

Total credits must be exactly 120.

Czech language courses are not in the correct order.

At least one course in this study plan will be given in German instead of English as usual in the term it was selected for.

The study plan contains the advanced course "Organization and Strategy Research". It is strongly advised that the preliminary organization course "Understanding Organizations: Theories & Applications" is taken before that, unless an equivalent course has been taken as part of a previous degree (e.g., your Bachelor's degree).

The study plan contains the course "Empirical Economics II". Students are strongly advised to take the preliminary course "Empirical Economics I" before that, unless an equivalent course has been taken as part of a previous degree (e.g., your Bachelor's degree).

The study plan contains the course "Advanced Microeconomics". It is recommended that students should have taken an intermediate microeconomics course before. This could be as part of a previous degree (e.g., your Bachelor's degree) or alternatively here in the form of the course "Mikroökonomie II" (in German).

- Alternatively: https://www.tu-chemnitz.de/wirtschaft/studium/master/be/studyplan.html
- 1st stage: Study plan (students starting in summer term) https://www.tu-chemnitz.de/wirtschaft/vwl2/downloads/Study-Plan-2026-v03-StartST.html
- 2nd stage: Schedule for this term - Vorlesungsverzeichnis https://www.tu-chemnitz.de/verwaltung/vlvz/suche/

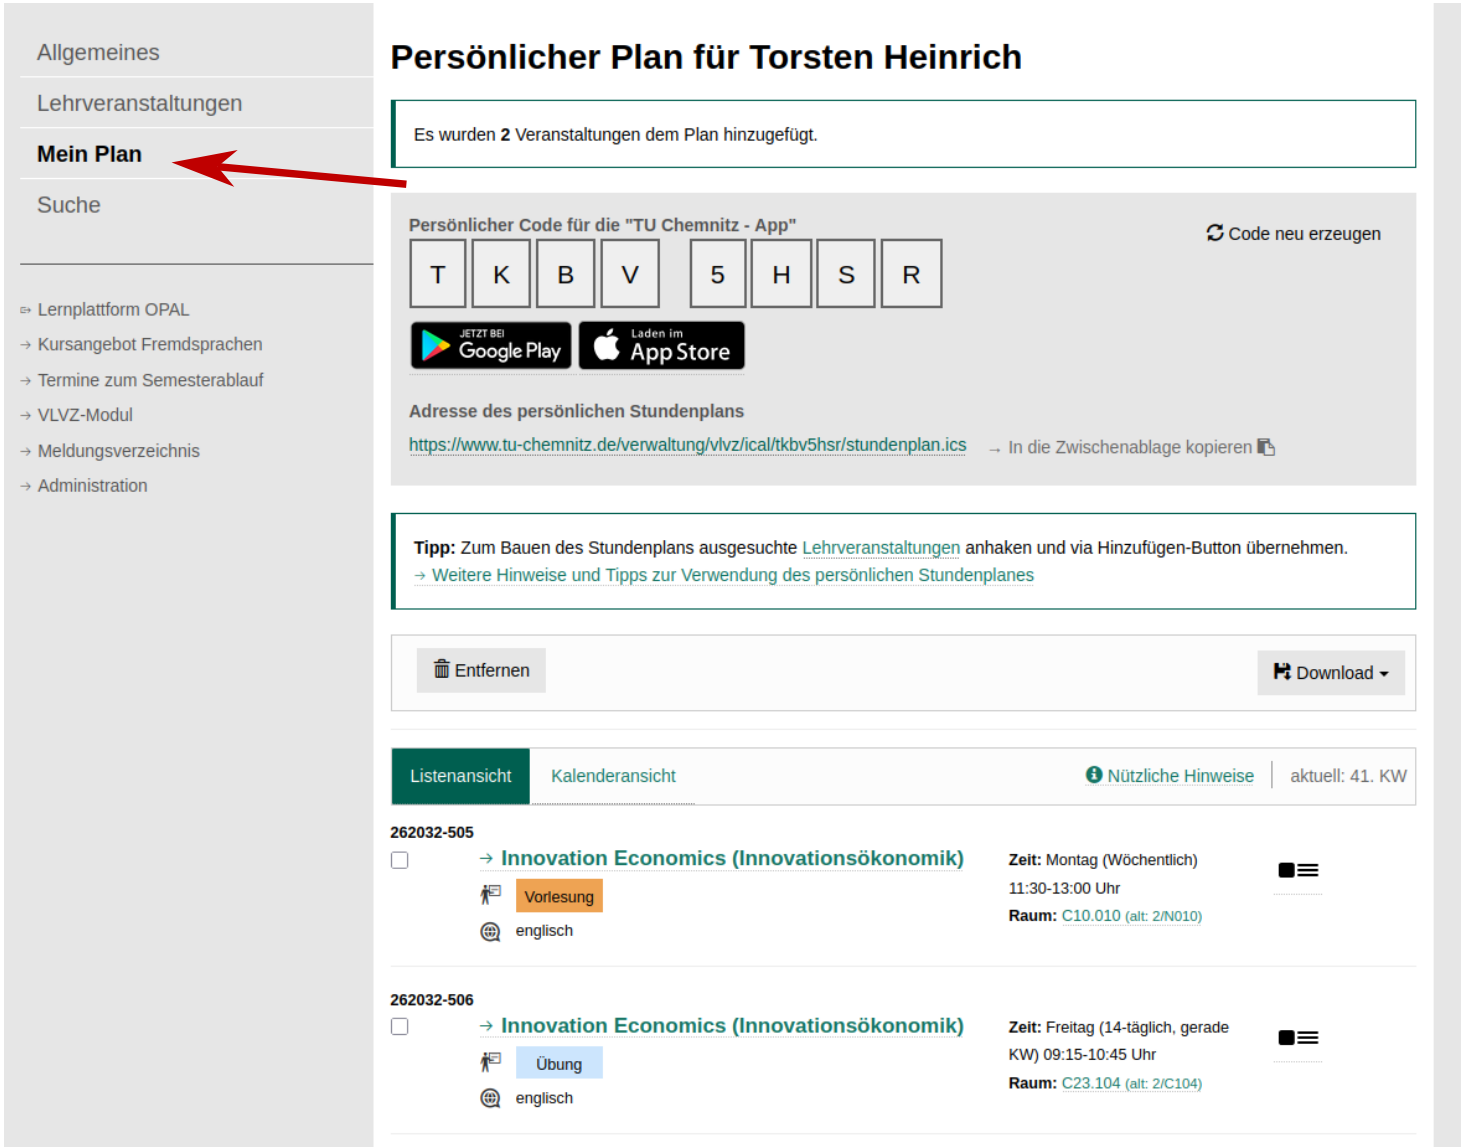

Schedule for this term

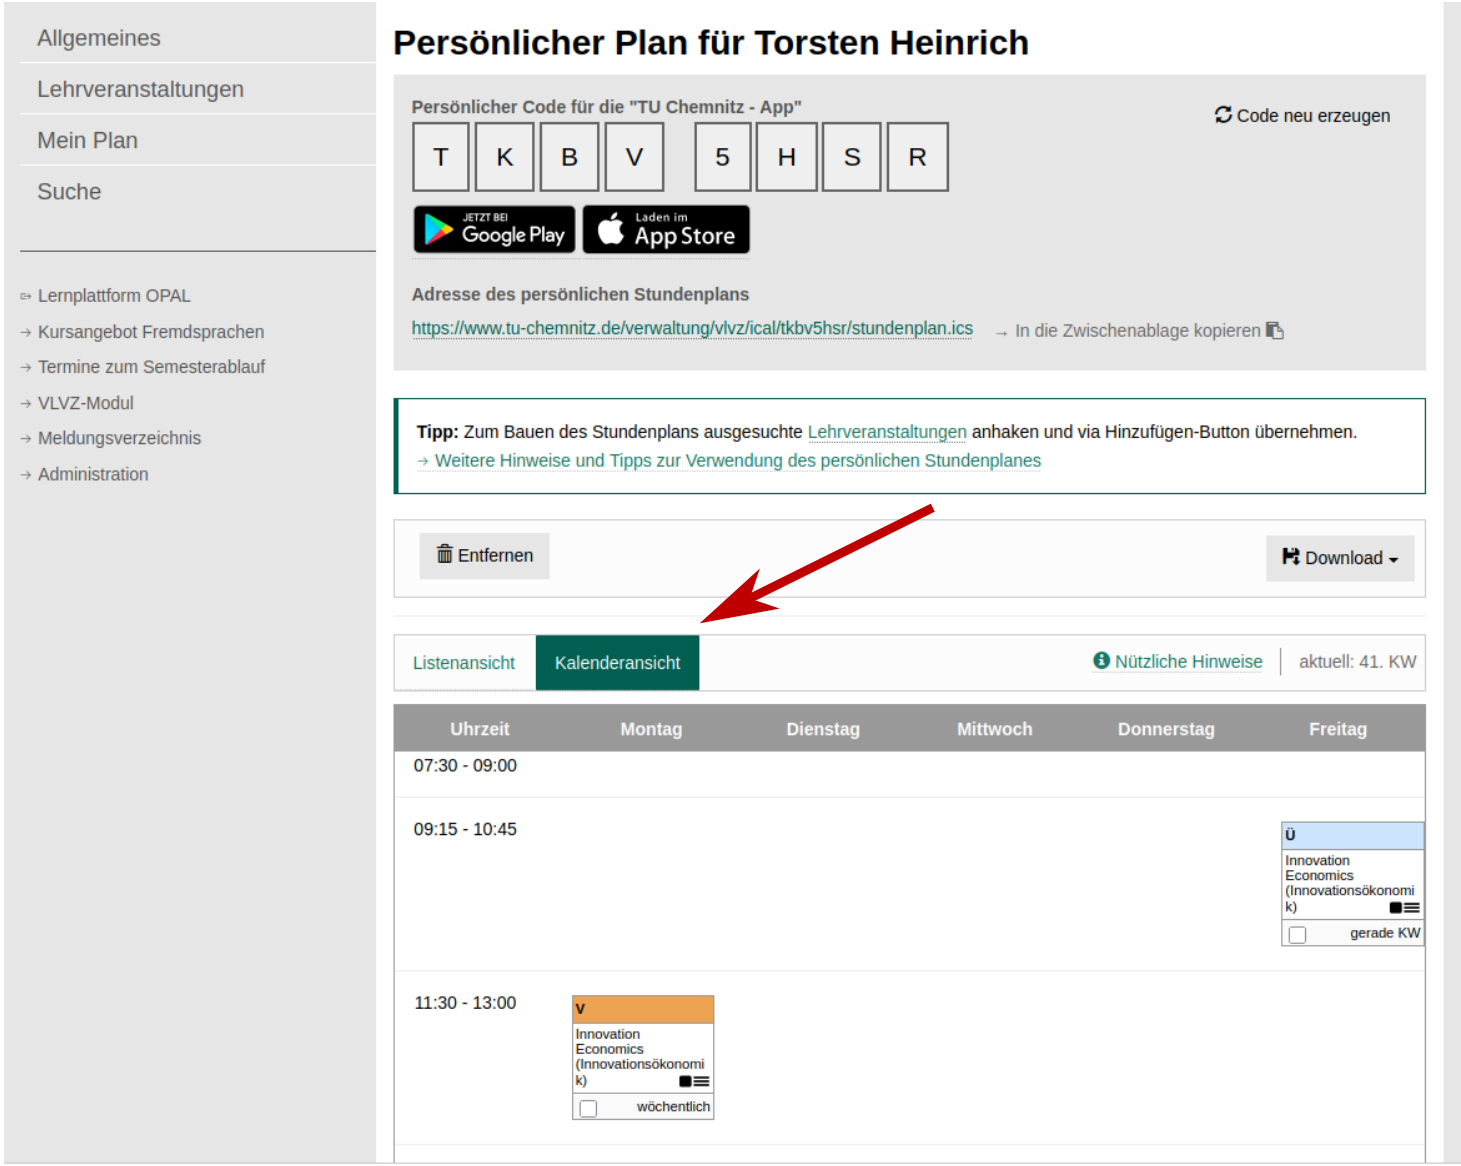

Schedule for this term

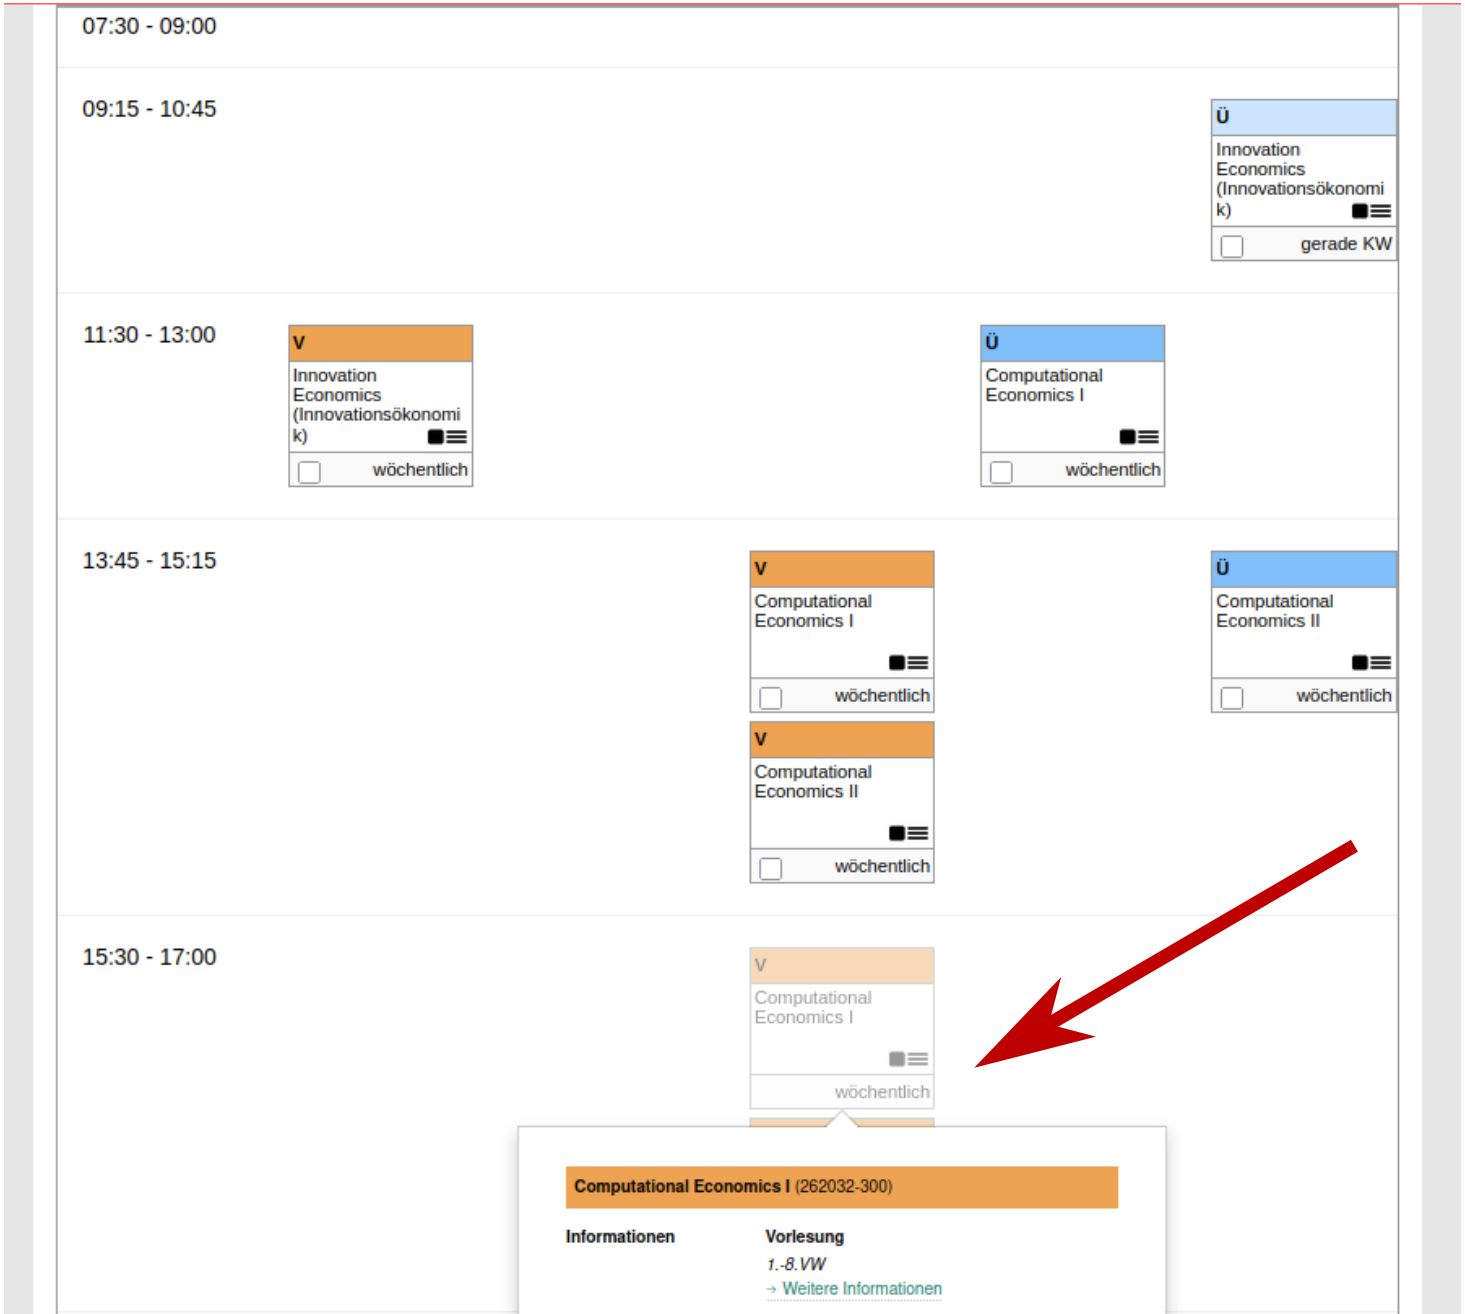

Schedule for this term

Schedule for this term

Schedule for this term

Schedule for this term: Caveats

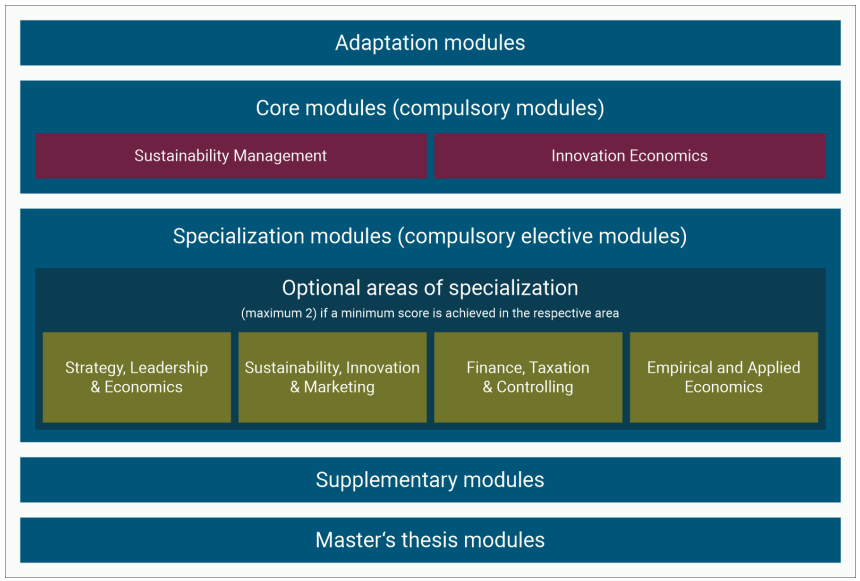

- Language-related courses are not in the Vorlesungsverzeichnis.
  - They can be found on the website of the Fachsprachenzentrum https://www.tu-chemnitz.de/sprachenzentrum/allgemeines/kursplan.php.en
  - This includes all languages in the study plan: German as a foreign language, Arabic, Chinese, French, ...
  - It also includes "Academic Writing and Speaking" (listed on the Fachsprachenzentrum website under "EfaF (English for all Faculties)" as "Englisch Kurs 4 (C1) Scientific Writing & Speaking")
- Seminars are often only listed with generic names ("Master-Seminar (BWL4)" etc.) in the Vorlesungsverzeichnis (see next slide).
- Some courses are given in German in some terms and then have German titles in the Vorlesungsverzeichnis:
  - "Valuation" is "Unternehmensbewertung" in this term
  - "Mathematical Models in Economic Sciences" - "Mathematische Modelle in den Wirtschaftswissenschaften"
- Some courses have slightly different titles in the Vorlesungsverzeichnis
  - Project Management Skills - Project Management Group A / B
  - Academic Skills - English for Academic Purposes

6 Seminars

1. Online resources
2. Course registration
3. Exam registration
4. Study program - what courses to take
5. Study plan - what courses to take when
6. Seminars
7. Master thesis

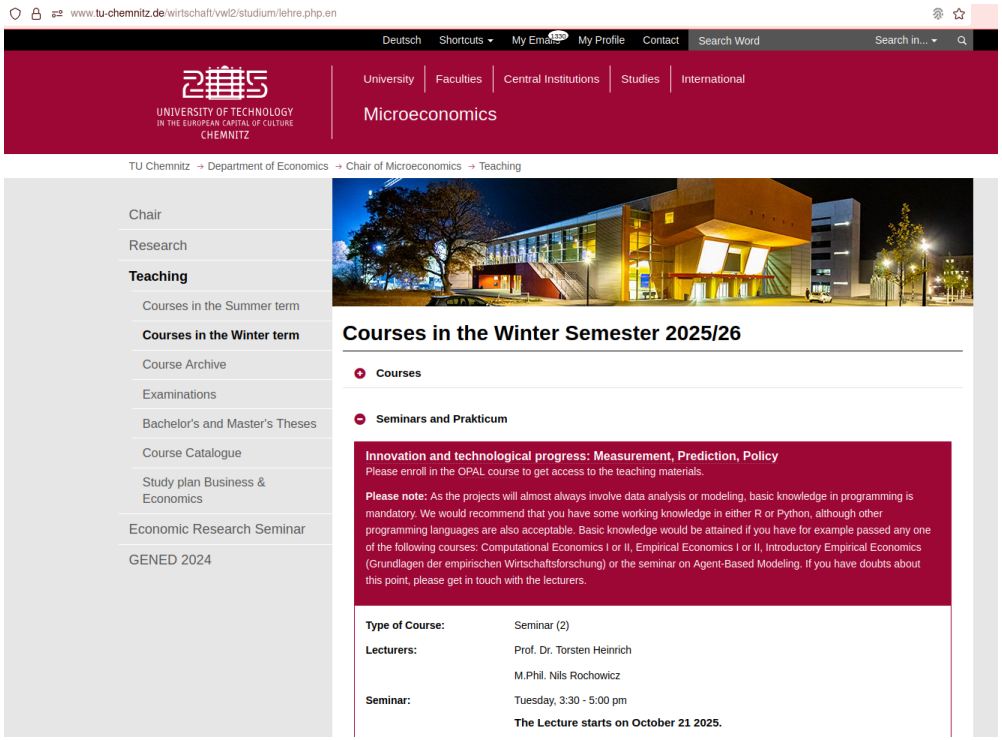

Seminars

- You should take at least one seminar before starting your Master thesis.
  - Gives you experience with research methodology before your thesis
  - Especially of you did not have to complete a thesis as part of your Bachelors
- Seminars include:
  - Organization and Strategy Research
  - Current Issues in Organization and Strategy in the Global Context
  - HRM Research
  - New Concepts of Leadership
  - Applied Energy & Climate Finance
  - Introduction to International Tax Management
  - Advanced Digital Finance
  - Seminar Microeconomics
  - Seminar Macroeconomics
  - Seminar General Economics
  - Seminar SIM

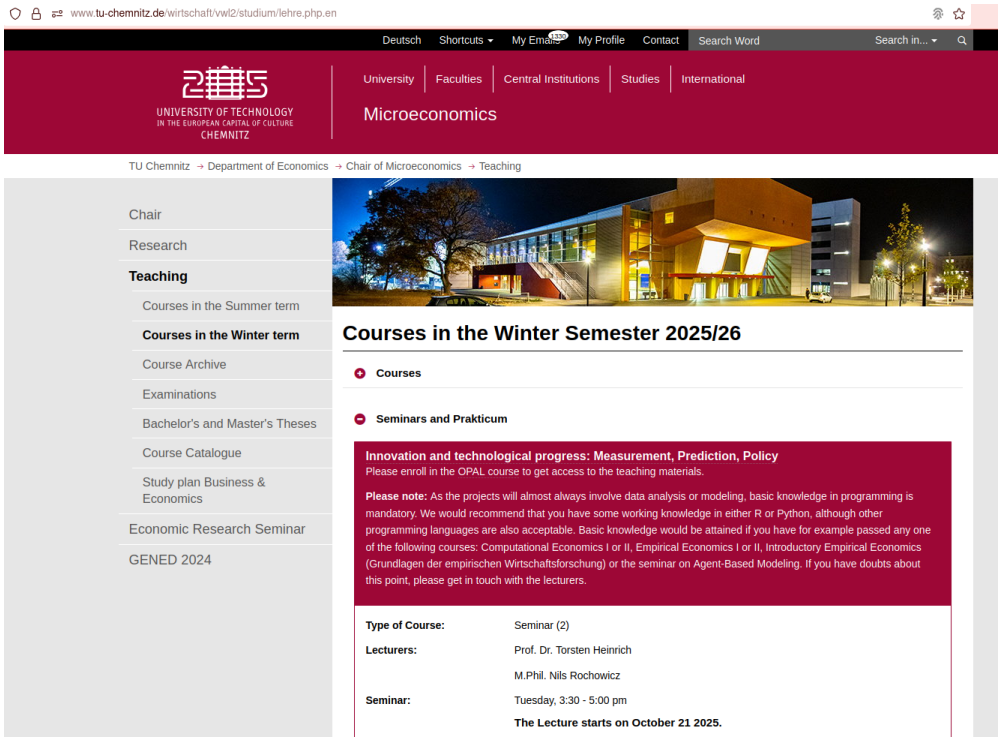

- You can also take other seminars relevant for business and economics and then apply for a credit transfer to replace one of the generic seminars (Seminar General Economics, Seminar SIM, etc.)

Schedule for this term: Seminars

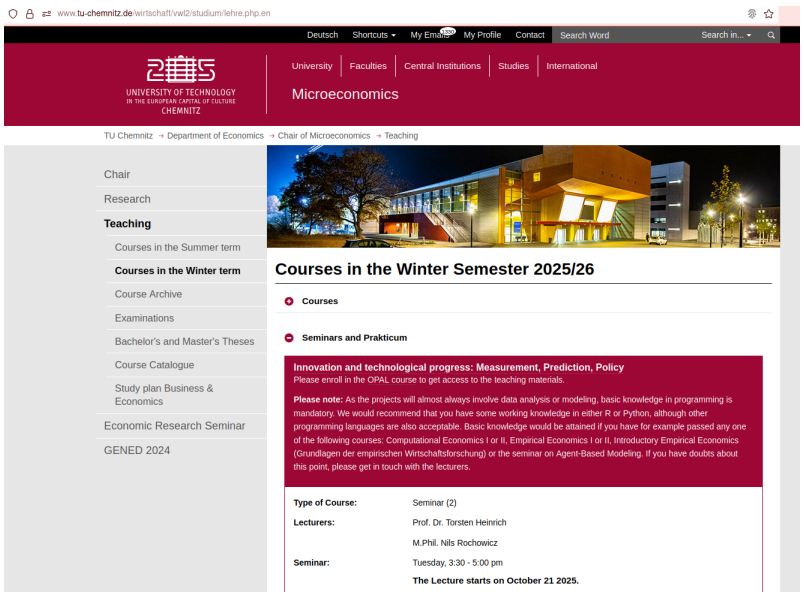

- For these, you may have to check the websites of the professorships.
- In the Vorlesungsverzeichnis, seminars are frequently only listed as "Master-Seminar (BWL4)", "Master-Seminar (VWL2)" etc.
- Topics of seminars may change from term to term.
- Seminars (especially those with changing topics) can often be used for various seminar-slots in the study plan.

Schedule for this term: Seminars

- This includes
  - Applied Energy & Climate Finance (Master-Seminar (BWL4))
  - Seminar Microeconomics (Master-Seminar (VWL2))
  - Seminar Macroeconomics (Master-Seminar (VWL4))
  - Seminar General Economics (Master-Seminar (JP VWL))
  - Seminar Sustainability, Innovation & Marketing (Master-Seminar (BWL8))

Seminars offered this term

- Applied Energy & Climate Finance ("Master-Seminar (BWL4)")
- Seminar Microeconomics ("Master-Seminar (VWL2)"; "Black swans and dragon kings: Why microeconomic data is often skewed")
- Seminar Sustainability, Innovation & Marketing ("Master-Seminar (BWL8)")
- Legal Issues of AI
- Organization and Strategy Research
- Current Issues in Organization and Strategy in the Global Context
- HRM Research
- New Concepts of Leadership
- "Business Valuation" may also be a seminar
- Project: Student Perspective to Improve the Attractiveness of the City Center

7 Master thesis

1. Online resources
2. Course registration
3. Exam registration
4. Study program - what courses to take
5. Study plan - what courses to take when
6. Seminars
7. Master thesis

Master thesis: How to proceed

- Find a supervisor.
- Agree on a topic with your supervisor
  - Some research groups have lists of topics on their websites.
  - The full list of research groups in the faculty is here: https://www.tu-chemnitz.de/wirtschaft/fakultaet/professuren.php.en
  - If you want to do the thesis with a company, you will have to involve the company as well at this stage.
- Formally register for the thesis.
- Write the thesis
- While you write the thesis, you also have to complete the module "Master-Colloquium"
  - For this, you have to give a presentation about the topic of your thesis.
  - First offered next summer term
- Submit the thesis before the submission deadline (19 weeks after registration of the thesis in step 3 above) expires to the ZPA.
  - Do not miss the deadline
  - Submit 2 copies in print plus one copy as a file on a pendrive or a CD-ROM or similar
