THE EN-ROADS CLIMATE WORKSHOP

Limit Global Warming!

The En-ROADS Climate Workshop helps build support for strategies to address climate change via interactive testing of the cutting-edge simulation model En-ROADS, created by Climate Interactive and MIT Sloan.

Participants propose climate solutions such as energy efficiency, carbon pricing, fossil fuel taxes, reducing deforestation, and carbon dioxide removal. The facilitator then tests these approaches using En-ROADS so that participants can see the impacts such as on atmosphere, health, economy, ecosystems, and biodiversity.

Join us to experience what it's like to create your own climate future using grounded conversations; the resulting experience is hopeful, scientifically-grounded, action-oriented, and eye-opening.

Workshop language is English.
